

REMARKS/ARGUMENTS

Claims 1-15 and 18-47 are pending.

In this Action, made final, the Examiner allowed claims 18-47, but rejected claims 1-15 under 35 U.S.C. §101 for claiming a mathematical algorithm per se.

In response, applicant has amended claim 1 to make it clear that the claim claims the receipt and processing of real communication signals. Claims 2-15 depend from claim 1. In view thereof, applicant requests that the Section 101 rejection of claims 1-15 as amended be withdrawn.

Since the subject matter of the claims has been indicated to be allowable, applicant asserts that no supplemental search is needed, and hence the amendment should be entered and the application should be allowed forthwith.

Applicant considers the foregoing to be dispositive of all issues in the application. But if the Examiner should deem that a telephone interview would advance prosecution, applicant requests the Examiner to call his attorney at the number listed below.

Respectfully submitted,

Simon Boland
